Professional Summary

Java Developer specializing in backend engineering, payment systems, and microservices architecture. Strong expertise in Spring Boot, REST APIs, AWS, and DevOps tools. Proven ability to deliver scalable solutions and improve operational efficiency, supported by hackathon achievements and industry certifications.

Technical Skills

- **Languages:** Java (Advanced), JavaScript, HTML/CSS, Kafka, GraphQL, REST APIs, Linux
- **Frameworks/Tools:** Spring Boot, Spring MVC, Hibernate ORM, React, JUnit, Mockito, ELK, Apache Struts
- **Cloud & Databases:** AWS, GCP, Azure, MySQL, MongoDB, PostgreSQL, Cassandra, Redis
- **DevOps:** Docker, Kubernetes, Jenkins, Terraform, Git, CI/CD, Bash Scripting
- **Practices:** Agile, SDLC, Code Reviews, Microservices, API Security, System Design

Work Experience

Opensols Infotech Pvt Ltd — Software Developer

Jun 2023 – Jan 2026

- Worked as a Software Developer contributing to backend application development, API integrations, and enterprise software solutions.
- Developed and maintained scalable Java-based applications using **Spring Boot**, REST APIs, and database technologies.
- Collaborated with cross-functional teams to deliver reliable software solutions and improve overall service quality.
- Demonstrated strong ownership, adaptability, and problem-solving skills while handling additional responsibilities and project deliverables.
- Recognized for professionalism, dedication, quick learning ability, and consistent contribution to organizational goals.

Projects

Core Payment Integration System

Jun 2025 – Aug 2025

- Developed a secure payment system across **three microservices** (validation, processing, trustly-provider) using **Spring Boot**.
- Implemented **HmacSHA256** request signing with Spring Security; unit-tested services using **JUnit** and **Mockito**.
- Built persistence using **Spring JDBC + MySQL**, applied **Factory & Builder** design patterns, and deployed on **AWS EC2 + RDS**.

CI/CD Pipeline Using Cloud & DevOps

Jan 2025 – Mar 2025

- Built a cloud-native CI/CD system reducing manual deployment time by **75%** and increasing deployment frequency by **300%**.
- Achieved **99.5% uptime** and **60% faster** feature delivery using DevOps best practices.
- **Tech Stack:** AWS, Git, Docker, Terraform, Jenkins

Education

- **Lovely Professional University** — BTech in Computer Science (7.28 CGPA) 2019–2023
- **Sri Chaitanya Junior College** — MPC (9.5 CGPA) 2017–2019

Certifications

- Core Java Made Easy — **Udemy** [View Credential](#)
- JDBC Servlets and JSP — Java Web Development Fundamentals — **Udemy** [View Credential](#)
- Spring Boot 3, Spring 6 & Hibernate for Beginners — **Udemy** [View Credential](#)
- The Ultimate MySQL Bootcamp — **Udemy** [View Credential](#)
- Linux Command Line Bootcamp — **Udemy** [View Credential](#)
